

# Oncotype DX recurrence score implications for racial disparities in chemotherapy and breast cancer mortality

## Background and Aims:

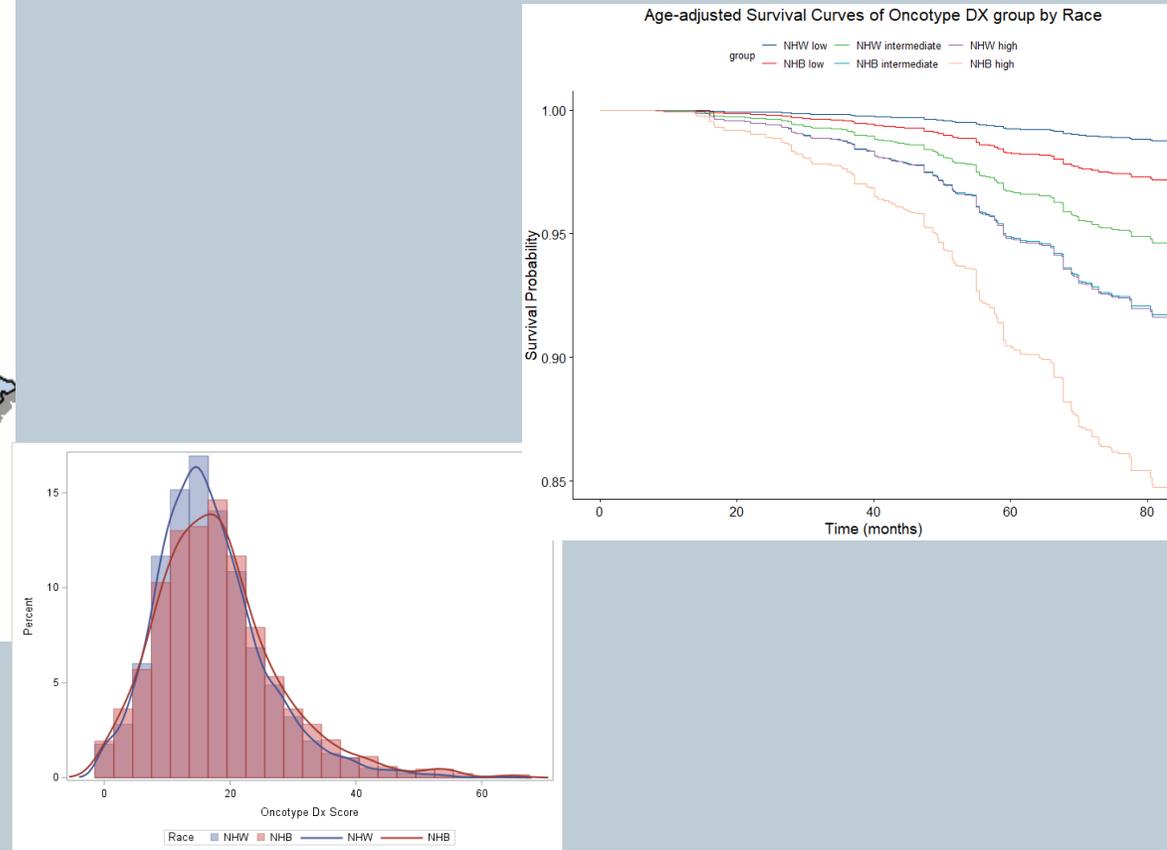

Early-stage hormone positive breast cancers receive Oncotype DX (ODX) testing to determine chemotherapy and risk of recurrence.

We evaluated differences in ODX testing by race and racial disparities in breast cancer survival by race and ODX recurrence scores.

## Methods And Results:

Collin LJ, Yan M, Jiang R, Ward KC, Crawford B, Torres MA, Gogineni K, Subhedar PD, Puvanesarajah S, Gaudet MM, McCullough LE. *NPJ Breast Cancer*.
